

ICAP V6.0 IMAGE CAPTURE SYSTEM (SOFTWARE ONLY)

END-ICAPV6

PRODUCT DESCRIPTION

With iCap®, you can capture images and video directly onto a computer hard drive or a network location from any external video source.

Cap allows you to capture images and video directly onto a computer hard drive or a network location from any external video source. The system catalogues the images by an identity for later reviewing, reporting, emailing or printing. Designed specifically for Windows, the export feature allows you to place images directly into report templates in Microsoft Word, or easily add them onto your Powerpoint displays. The iCap system also gives you the ability to annotate your images with text, lines and shapes.

Designed to work with or without a touch screen monitor, the iCap system can be used across a variety of settings. It utilizes an icon, push-button style interface, making the system easy to use. Pushing a button on the touch screen or using a mouse to click on the button achieves a desired result. Most actions can be completed with just one or two clicks.

User Requirements:

- A USB port camera or device that provides a IEEE-1394 or USB compatible digital format for recording OR a video digitiser that will convert analogue video to digital
- Microsoft Windows 7, 8, 10 • CD-ROM drive for software installation
