

PERIOSTEAL ELEVATOR GOLDMAN FOX PATTERN

128-008

PRODUCT DESCRIPTION

Double ended periosteal with 2 different sized blades

Features

- Double ended with small and larger “blades” (A&B)
- Deluxe (large diameter) handle for better grip

Uses

- Raising soft tissue flaps (mucoperiosteal) by separating the periosteum (with all soft tissues above) from the bone.
- As a gingival retractor and guard e.g. while extracting teeth to avoid soft tissue trauma by the dental drill or elevators.

How to use

- Use with the flat side of the blade towards the bone surface and the rounded back of the blade under the soft tissue.
- Do not use a flat angle to the bone surface as this is more likely to split the soft tissue planes
- Hold at an obtuse angle
- Use a twisting action similar to peeling an orange with a fingernail

ADDITIONAL INFORMATION

Animal

Mixed
