

CANINE CRUISER ANIMAL STRETCHER

119-050

PRODUCT DESCRIPTION

Easily transport injured, sedated or deceased patients

Unlike other stretchers, the Canine Cruiser can be used single handed (like a trolley) by utilising the adjustable lifting handles at the top and 7.6 cm multi-terrain wheels located at the base.

Easy to wipe clean, the PVC fabric is a durable sandwiched mesh that is stain and bacteria resistant and virtually indestructible.

There are six handle options providing balance and support for both patient and operators. Durable 5 cm webbing straps with Velcro fastenings are positioned along the length of the stretcher so that animals of all shapes and sizes can be securely transported. Its lightweight frame makes this the perfect gurney for use in the ambulance, for RTAs or for home visits / PTS. In the clinic, hospital or wildlife centre, the Canine Cruiser can be hung safely, flat against the wall ready for use.
