

BURTONS QUIET TIME CAGE

175-02-CONFIG

PRODUCT DESCRIPTION

Built from chemical resistant polypropylene, Burton's 'Quiet Time' Cages offer a warm and quiet environment!

Burtons Quiet Time range of polypropylene cages have been developed to offer a warm environment whilst allowing natural light to enter the cage. Thanks to the natural properties of Polypropylene the cage is able to retain more heat than stainless steel alternatives. Helping to keep the cage warmer to touch and quieter. Due to the low reflective surfaces of the material these cages are particularly suitable for cat care.

Our smartly designed Quiet Time double door cages are designed without the need for a central brace, giving you complete access to the patient and reducing the risk of back strain. A central divider panel is available separately, enabling you to easily create two smaller cages.

The cage body is made from high quality 4.5mm chemical resistant polypropylene with a plastic welded 2 piece body. Supplied with sound deadening insulation as standard and constructed with a stainless steel substructure, Burton's Quiet Times cages offer superior strength and increased hygiene with minimal dirt traps.

All of our cages are available in standard sizes from stock with special made to measure sizes available on request. The completely modular, standardised design ensures not only an easy set up but allows your bank to grow with your practice. They are even compatible with any existing Burton's, Ken cage & Shorline cages that you may have.

Features

- Stainless steel, electro-polished removable door may be mounted either side
- No central brace
- Covered rear corners on top and bottom eliminate accumulation of dirt and bacteria
- Pinch to open style self-latching door latch, designed for one handed opening and closing
- Stainless steel vertical spokes are spaced 1€ apart and welded at every intersection to cross members and frame
- Heavy gauge stainless steel die formed barrel style hinges operate smoothly for the life of the cage
- Stainless steel hinge pins remove easily for cage maintenance

- 4.5mm chemical resistant polypropylene with a plastic welded 2 piece body and stainless steel sub frame
- Optional divider panels available
- Non reflective - ideal for cats

Doors

All of our doors utilise heavy stainless steel die formed, adjustable barrel style hinges for years of smooth, reliable operation.

All cages are supplied with electro polished stainless steel mesh doors with vertical spokes spaced at 1€ apart and welded at every intersection for superior strength and rattle less operation. The pinch to open latch allows easy one-handed opening with a secure, simple push to close design. All of our doors incorporate radius edges that go corner to corner for easy cleaning and patient security with a single handed opening and a simple push to close self-locking latch design.

Socket Layers

Complete your cage arrangements with one of our stainless steel power socket layers. Socket layers can add power sockets, optional oxygen supply and temperature control (for heated cages) to your cage bank. All conveniently located at the top of the cage bank.

Heated Cages

Create a more comfortable temperature controlled environment with the help of built in temperature pads, include safety cut outs as standard and rear mounting on the back of the cage.

Simply add these to any cages at the time of order *

*Requires the addition of a socket layer for temperature control panel.

Bases

All of our cage banks can be built on a stationary or mobile base design. Whether you choose to use a built in plinth or opt for a base which raises the banks and adds additional storage. Our range of base options will allow you to get your bank exactly how you need it.

Complete your bank

Complete the look of your bank with a full range of top and side panels. Finished in complimentary stainless steel, these great looking panels are easy to clean and are the perfect finish to any bank.

Full range of accessories

We have one of the widest ranges of cage bank essentials from clipboards to IV hooks. Many of which are completed in complimentary 304 grade stainless steel for a hygienic, easy to clean, long life durability.

Let us help with the design...

At Burtons, we offer a completely complimentary custom design service, meaning whatever your plan for the room, whether it is to gain ISFM certification or just maximising every bit of space. Our dedicated projects team will use their expert knowledge to complete a design that will be both functional and to specification.

We can arrange for a full site survey or you can simply provide us with your room dimensions and drawings and our projects team will complete a free 3D room design based around your needs.

Installation

If it's a single cage or a new practice setup the easy installation process is straight forward and fast. Once your happy with your order, all our cages are delivered pre-made and ready to go, but if you prefer why not take advantage of our in-house installation team, who can then arrange a suitable time to build your new bank, working with you to minimize disruption.

(Please note: we recommend that stainless steel cage banks should be earth bonded. You should consult your electrician for advice and have them carry out any recommended work)

Manufactured to last

We don't just supply it! It was designed and built by Burtons in the UK at our principle manufacturing facility in Maidstone, Kent Using the latest CNC's and laser manufacturing processes and high quality stainless steel materials this product has been engineered from the ground up to last!
