

LARGE ANIMAL CIRCLE CIRCUIT

103-400

PRODUCT DESCRIPTION

Circle breathing systems offer the best control of large animal anaesthesia. They are less prone to overheating and the position of the canister; away from the patient reduces the likelihood of absorbent inhalation

The generous breathing tubes (2 metres long) allow the equipment to be placed away from the patient so that it does not invade the immediate work area. This unit is one of the most popular large animal breathing systems available, having been in production for the last 20 years. It is compatible with most anaesthetic machines suitable for large animal work.

Key Features:

- Stainless steel canister and Y piece
- 2 metre breathing tubes
- 3 metre gas supply hose
- Durable 30 litre rebreathing bag - also available in 15 litre
- E.T. tube connectors sold separately, sizes from 14 to 40mm
- Tapered hose connections
- Low dead space with built-in removable valves
- Designed, developed and manufactured by Burtons in the UK
