

BURTONS VETAIR CLASSIC MOBILE DENTAL UNIT WITH STARTER KIT & SCALER

118-704-2-BUNDLE

PRODUCT DESCRIPTION

A compact, all-encompassing mobile dental unit

Offer includes LED Scaler & Dental Starter Kit and 4 x Burton's High Speed Semi-Disposable Dental Handpiece.

The Burton's VETair Classic's array of features has been designed with vets and vet nurses in mind, making dental procedures as efficient and straightforward as possible. Whilst its minimal maintenance requirements make it an extremely cost-effective dental system.

Designed & manufactured by Burton's in the UK, the VETair Classic is built upon a 'Lifetime' stainless steel frame, designed to provide ultimate longevity and stability, whilst still being easy to clean. Its compact size means you have everything to hand without taking up extra space that could be better utilised. An accessible storage drawer enables you to keep all your instruments and spares within the dental system for easy access during procedures.

Strong lockable castors enable easy moveability for getting as close to your patient as possible, or for moving it out of the way when not in use. All Burton's dental machines are designed alongside Burton's knee-space tub tables, allowing you to easily tuck your machine away underneath the table when not in use.

Our latest improvement to the VETair Classic is the oil-free compressor, which eliminates the risk of oil contaminants within the dental machine and reduces maintenance costs and downtime. But unlike other oil-free compressors, the VETair removes the stigma of oil-free = noisy. Using Burton's very own noise-dampening technology, which you may have already experienced within our concentrators., this combination of spring-mounted components softens the inertia of starting and stopping the pump, providing a gentle, quiet compressor action. Reducing stress for practice staff.

The additional starter kit and scaler included in this bundle means that this three-station control panel includes everything you will need to get started. A high-speed LED handpiece for drilling, a low-speed LED handpiece for polishing and finishing and an air/water spray for cleaning away debris and cooling when high-speed instruments are in use.

A simple flick switch on the control panel allows easy switching from one handpiece to another when you have your hands full, whilst a foot pedal starts and stops the power to each one.

Key Features

- Burtons noise-dampening technology eliminates the stigma that oil-free is noisy
- Accessible drawer for handpiece and accessory storage
- High-quality, lockable castors for easy movability
- Three station control unit including high speed, low speed & air/water mist
- The VETair works via a foot-pedal and simple flick switch between handpieces, freeing up hands during procedures
- A good-sized onboard water bottle means there is no need to be stopping to re-fill water bottles during procedures. This one bottle is used for an additional scaler as well as handpieces for less maintenance of water reservoirs
- Reduce treatment time to reduce anaesthesia risk by having everything you need in one place
- Fits underneath Burtons' knee space tub tables when not in use
- Coiled cables keep trailing leads from getting run over on the floor and help keep the system tidy when not in use
- A fixed power bank to the back of the machine gives you the flexibility of plugging in additional accessories needed, this is fixed high on the machine, out of the way of any liquid spillages
- Bright LED handpieces included for improved visualisation
- Designed & manufactured in the UK
- Fully supported by Burtons after-care support team
- Consumables such as 'O' rings and water bottles can be easily purchased and replaced if, and when, needed
- Dimensions: 750mmH x 670mmW x 450mmD

VETair Technical Specs:

- Dimensions: 750mmH x 670mmW x 450mmD (including handles and handpiece holders)
- Weight: 52kg
- Power: 240v AC, 50/60hz, 3.6 Amp, 500W
- Volume: 55 dB(A)
