

LIVE CPD WEBINAR: MECHANICAL VENTILATION WITH MERLIN LEVEL 2: PRESSURE CYCLING

CPD-WEB-VENT-LEVEL-2

PRODUCT DESCRIPTION

Burtons Academy offers live, high-quality, personalised CPD webinars on subjects relevant to the clinical requirements of your practice and colleagues.

Suitable for vets, nurses, and other clinical professionals, the webinars cover a wide range of topics, including anaesthetic monitoring and patient ventilation. New subjects are added regularly.

The webinars and associated materials have been designed and written by our lead clinical professionals, Keith Simpson MRCVS and Karen Heskin MRCVS, who have decades of collective experience spanning general and referral practice, research, development, and education. Karen will present the webinars.

What will this webinar cover?

This webinar is suitable for vets and nurses with experience of using Merlin for volume cycling, who want a more in-depth understanding of mechanical ventilation, and wish to use Merlin for pressure cycling.

The principles of pressure cycling will be explored and we will investigate when and why this approach might be used. The preparation and operation of Merlin in pressure cycling mode will be evaluated together with Merlin's unique safety features. This webinar also examines the Merlin ventilator's Assist mode and addresses common challenges, such as "fighting the ventilator".

This in-depth exploration of pressure cycling will help veterinary professionals elevate their ventilation practices, fostering safer and more effective respiratory support for their patients.

What's included?

- Revision of the physiology of respiration and the physiological effects of IPPV
- Cycling modes
- Principles of pressure cycling and why & when to use it
- Step-by-step guide to using Merlin for pressure cycling
- Merlin Assist Mode
- Managing "fighting the ventilator"
- Use of Merlin for thoracotomies

A live online session running for approximately one and a half hours and concluding with Q&A.

There is no limit on the number of people who can join the webinar, including from branch clinics: multiple devices can be used simultaneously from multiple locations. A webinar link and joining details will be provided.

Please note that the webinar will not be available to download or watch on demand.

Notes will be provided following the conclusion of the webinar, and CPD certificates will be available if required.

Speaker:

Karen Heskin BVSc CertSAO MSc(VAA) MRCVS* - Veterinary Clinical Consultant (Anaesthesia)

Dates & Times:

Following the purchase of your session, either online or by contacting our Sales team on [01622 834300](tel:01622 834300), you will receive a follow-up email with a selection of dates and times to choose from. Once you have selected a date and time, we will forward a Teams meeting link, additional joining information, and details of what to expect during the webinar. A session lasts around one and a half hours.

Please remember that attendance is live and sessions are not recorded.

*Karen Heskin has a background as a small animal GP and referral surgeon, making her the perfect candidate to tackle the day-to-day issues experienced in practice. She has a special interest in anaesthesia, including capnography, monitoring, ventilation and perioperative analgesia and is a key member of the Burtons Clinical team and Burtons Academy.

Evidence-based veterinary medicine is at the core of this webinar and Karen is keen to share this knowledge with the veterinary community.
